WORK EXPERIENCE

Data Engineer II, Arkoz, USA

May 2023 - Present

- Automated ETL workflows with **Apache Spark, Hive, and Airflow**, using partitioning, caching, and query tuning to boost data transformation speeds by 35%, cut costs by 20%, and improve processing efficiency by 60%.
- Built a data warehouse on MS SQL Server using SSIS, CDC, and **dimensional modeling**, cutting report generation times by 70% (from 13 to 4 hours) and integrated with Power BI, streamlining reporting and improving data quality.
- Engineered and enforced data privacy protocols and **governance** frameworks, integrating Role-Based Access Control (RBAC), which strengthened security, ensured 100% regulatory compliance, and reduced data access issues.

Data Engineer II, McKesson, India

Jan 2022 - Jul 2022

- Streamlined **ELT** pipelines using Azure **Data Factory** and 50+ Azure **Databricks** notebooks for 3 dependent systems to process upward **7M+** transactional records every **6** hours to deliver **business intelligence** insights.
- Optimized execution time of **3 big data batch pipelines by 40%** by employing **Spark** techniques, efficient coding standards, and refining data transformation logic to meet business needs and minimizing data redundancy.
- Guaranteed **data platform integrity** and performance through daily and weekly testing, peer code reviews, and continuous optimization of notebook execution times, significantly **reducing azure costs by nearly \$0.2M annually**.
- Coordinated a team of 4 and addressed cross functional teams in an **Agile environment** owning product backlogs by gathered requirements from **DataOps, Stakeholders** and demoing incremental builds (CI/ CD) on Azure DevOps.

Data Engineer, Gilead Sciences, India

Jan 2020 – Jan 2022

- Migrated on-premises **business intelligence** system to AWS, developed **30+ databricks notebooks (PySpark, SQL)** with zero pipeline failures and data discrepancies on the production environment on pilot deployment.
- Developed a **Python, Spark SQL based validation framework** to automate data validation across the data engineering lifecycle, reducing error rates by 95% and saving 6 hours of daily manual effort for 4 teams.
- Architected a **Snowflake** data warehouse with dimensional modeling, utilized AWS **Glue for ETL**, and implemented **CDC** via **AWS Data Migration Service** and integrated with **Tableau**, reducing report generation times by 40%.
- Orchestrated an automated ETL workflow utilizing **Airflow** DAGs, effectively scheduling and coordinating tasks, leading to a 30% decrease in manual effort and ETL task execution time.

Associate Data Engineer, Fratello Innotech, India

Mar 2019 – Jan 2020

- Elevated user experience and reduced report load time to 7 seconds, modernised analytics in **Power BI along with RLS** thereby enhancing data accessibility and security, formulated DAX measures for 5 reports and dashboards.
- Designed and implemented SSIS ETL packages, **reducing data processing time by 15% for terabyte-sized datasets**, and leveraged SSAS tabular models for advanced analytics, enabling data-driven decision-making.
- Restructured custom **ETL** pipelines for a finance client using AWS S3, **Glue** and ingested in AWS **RedShift**.

Junior Data Engineer, Fratello Innotech, India

May 2018 – Mar 2019

- Integrated workflows utilizing flat files (JSON, CSV), and **REST APIs**. Worked on SQL tasks including DDL, DML, TCL, window functions, subqueries, CTEs, and focused on development of **40+ stored procedures and views**.
- Performed auditing, inspecting and visualizing **S3** server access logs using AWS **Lambda**, and AWS **Athena**.

PROJECTS

- Uncovering Coordinated Twitter Campaigns Using Spark/AWS** (PySpark, S3, EMR, Redshift, QuickSight) ([Git](#))
- OLTP and OLAP implementation on H1-B visa data for operational usage and analytics** (AWS Lambda, AWS Glue, Snowflake, MySQL, Tableau, Python, Pandas, OLAP, Kimball dimensional modeling, ERD, Star Schema) ([Git](#))
- Real-Time Stock Market examination with Kafka** (EC2, Athena, Apache Kafka) ([Git](#))

CERTIFICATIONS

- [AWS Data Engineer Associate](#)
- [Microsoft Certified Azure Data Fundamentals](#) & [Microsoft Certified Azure AI Fundamentals](#)
- [Tableau Desktop Specialist](#) & [Certified Google Data Analytics](#)

SKILLS

Big Data formats and technologies: Parquet, ORC, Hadoop, Kafka, Presto, YARN

Cloud: AWS (Glue, EMR, Lambda, S3, Redshift), Azure Synapse, GCP (DataProc, GCS, Pub/Sub, Big Query)

Data Science Proficiencies: NLP, Generative AI, LLM (RAG), Text Mining, Machine Learning

Programming: Python (Pandas, NumPy, Seaborn, Scikit-learn), SQL (Joins, Subqueries), MATLAB

ETL and Visualization: Airflow, DBT, SSIS, SSAS, Azure Data Factory, Informatica, Power BI, Tableau, QuickSight

Workflows and Operating Systems: Agile, Git, Jira, Service Now, Docker, Visual Studio Code, Terraform, Linux

EDUCATION

Master of Science in Data Analytics, San Jose State University, San Jose, CA, USA

Aug 2022 - May 2024

Bachelor of Technology in Computer Science, JNTU, Kakinada, India

Jun 2015 - May 2019
